	Examiner Richard L Schilling	Art Unit 1752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit 1752

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) The invention was described in (1) an application for patent, published under Section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. § 102(a) or (e) as being anticipated by Simpson et al. '283. Simpson et al. '283 (see particularly paragraphs 5-11; 19, 24, 55; the Examples) disclose heat transferable protective layers with the same gloss enhancing UV absorbing compounds as disclosed in applicants' specification, e.g. Formula II on page 6 and specific compounds on pages 7-9. Elements I-1-3 in Simpson et al. are the same as elements I-11-13 of applicants' Examples. Element C-2 of Simpson

et al. is the same as element I-10 of applicants' Examples; and element C-3 of Simpson et al. is the same as element I-15 of applicants' Examples. The thermal printer in the Examples in Simpson et al. is operated at the same speed as in applicants' Examples, i.e. 16.9 mm/second. The UV absorber compounds of Simpson et al., being the same as the compounds disclosed in applicants' specification, are inherently gloss enhancing compounds. Simpson et al. incorporates by reference the protective layer polymers of Oldfield et al., U.S. Patent No. 5,332,713.

2. Huglin et al. is cited of interest in the art as disclosing UV absorbers as disclosed in applicants' specification. Saito et al., Mizumachi et al., Suzuki et al. and Hayashi et al. are cited of interest in the art as disclosing thermally transferable protective layers containing UV absorbers which may be transferred using thermal print heads. Kobayashi et al. is cited of interest in the art as disclosing thermally transferable protective layers containing UV absorbing compounds.

3. Any inquiry concerning this communication should be directed to Mr. Schilling at telephone number (571) 272-1335.
